DEPARTMENT OF PSYCHOLOGY

Criteria for Promotion and Tenure 2020-2021, voted on and approved by the faculty, November, 2020

Decisions regarding promotion and tenure will be made on the basis of an evaluation of the candidate’s record of research accomplishment, teaching effectiveness, and service to the university and to the profession. Specific criteria for evaluating each of these areas follow. No priorities are implied in the serial ordering of these criteria, nor is it required that a candidate must satisfy the entire set of criteria in a given area.

A. Research

1. Publications in refereed journals (both empirical studies and theoretical reviews).

2. Books, textbooks, monographs, chapters

3. Funded grants and contracts

4. Service on editorial boards of journals

5. Membership on grant study sections

6. Submitted grant applications

B. Teaching

1. Student, self, and peer evaluations of undergraduate and graduate courses, with consideration given to the nature of the course (“service” course vs. area of specialization)

2. Supervision to completion of graduate theses and dissertations

3. Supervision of undergraduate research projects

4. Teaching awards

5. Innovative curriculum development

1
6. Papers presented at professional meetings with student authorship

C. Service

1. Elective or appointive positions in professional societies
2. Service on editorial boards of journals
3. Membership on grant study sections
4. Participation on departmental, college, and university committees
5. Community service of a professional nature
6. Administrative work

Promotion to Associate Professor

Promotion to the rank of associate professor implies that a faculty member has demonstrated a commitment to scholarship by maintaining a consistently high level of research productivity and teaching effectiveness, along with a commitment to the university and to the profession through appropriate service activities. Demonstrated merit, not years of service, is paramount. The primary factors in promotion to associate professor are the candidate’s record of scholarly research activity and teaching effectiveness.

The quality and quantity of the candidate’s record of scholarly research activity will be assessed with respect to the criteria listed above. A consistent record of research productivity is expected. Although the aggregate record of research accomplishment will be the major object of evaluation, it is expected that the candidate will have published an average of at least one article in a refereed journal per year; occasionally, a larger-scale work (e.g., monograph or book) may satisfy the publication criterion for a period of more than one year. It is also expected that the candidate at least occasionally present at conferences and apply
for grants or contracts. Although collaborative research with other investigators is valued, evidence of independent scholarly activity is expected. Evidence of independent scholarly activity may include publications based on work conducted at Florida Atlantic University, grants funded or submitted as PI, and publications co-authored with students working under the candidate’s supervision.

Teaching effectiveness is recognized as essential for maintaining a quality academic program and is encouraged and rewarded by assigning to it a substantial weight in the annual evaluation. Student evaluations and the successful mentoring of students (especially the mentoring to completion of student research projects, theses, and dissertations) will be emphasized in the evaluation of teaching effectiveness. Despite the importance of teaching effectiveness, however, outstanding accomplishment in teaching/mentoring cannot substitute for research productivity.

Although each faculty member is expected to demonstrate their commitment to the university and to the profession by appropriate service activities, service will be accorded less weight than research and teaching in the evaluation process.

Annual evaluations will be considered when making decisions concerning promotion to associate professor. However, the overall magnitude and pattern of a candidate’s cumulative record in research, teaching, and service during their years as an assistant professor will be assigned greater weight than annual evaluations when making promotion decisions.

**Promotion to Professor**

Promotion to the rank of professor normally indicates that the faculty
member has achieved a reputation for excellence in scholarship at the national or international level. Again, demonstrated merit, not years of service, is paramount. In addition to evaluating the quality and quantity of research productivity, evidence of national/international visibility will be assessed on the basis of letters from acknowledged leaders in the candidate’s field, number of citations in the literature, invited addresses at major professional meetings, and membership on editorial boards or grant study sections.

In addition to a strong record of research accomplishment, a candidate for promotion to professor is expected to have demonstrated an ongoing commitment to the training of graduate students and a consistent record of effective teaching. Student evaluations and successful mentoring of students (especially the mentoring to completion of student research projects, theses, and dissertations) will be emphasized in the evaluation of teaching effectiveness. Although service is accorded less weight than research and teaching, it is also expected that the candidate will have served in leadership positions on university committees and/or professional associations.

Annual evaluations will be considered when making decisions concerning promotion to professor. However, the overall magnitude and pattern of a candidate’s cumulative record in research, teaching, and service during their years as an associate professor will be assigned greater weight than annual evaluations when making promotion decisions.

Tenure

For faculty hired at the rank of assistant professor, qualifications for the granting of tenure are the same as those required for promotion to associate
professor. For faculty hired at the rank of associate professor or professor, a
recommendation concerning tenure status (i.e., whether the faculty member should
be hired with or without tenure) will be made at the time of appointment.
Ordinarily, a recommendation for tenure upon appointment will be made only when
the candidate has provided strong evidence that he or she is likely to make strong
contributions to research and teaching at Florida Atlantic University. For faculty
hired without tenure at the rank of associate professor or professor, the criteria for
granting of tenure are the same as those required for promotion to associate
professor, described above.

Annual evaluations will be considered when making decisions concerning
tenure. However, the overall magnitude and pattern of a candidate’s cumulative
record in research, teaching, and service during their years as a non-tenured
faculty member will be assigned greater weight than annual evaluations when
making tenure decisions. An in-depth evaluation of progress toward tenure will
be carried out when a faculty member has completed three years in a tenure-
earning position.

Criteria for Promotion of Non-Tenure Track Faculty

Promotion of Instructors and Lecturers will follow the Provost’s
April 2016 Memorandum, Appointment and Promotion of Instruc-
tors and Lecturers. Promotion of Assistant Scholars, Assistant
Scientists, and Assistant Research Professors will follow the Provost’s April
2016 Memorandum, Appointment and Promotion of Assistant
Scholars/Assistant Scientists/Assistant Research Professors.
Criteria for Third Year Reviews

Third Year Reviews will follow the Provost's March 2019 Memorandum

*Guidelines for Third Year Reviews (Revised).*
