Black and Brown communities face climate gentrification in Miami, perpetuating patterns of social inequity through spatial and economic instability (Hoermann, 2021).

Storytelling within communities can create transformational spaces, build more meaningful relationships, and empower people experiencing racial marginalization by providing a coping mechanism and affirmation of lived experiences (Rodriguez 2010).

GOAL

This project aims to center the voices of an ethnic enclave facing displacement pressures.
On March 27, the five-hour event consisted of two parts. Participants processed experiences during a two-hour poetry workshop consisting of an introduction to the topic, meditation, and exercises to produce written work reflecting participants’ lived experiences. The second half of the event consisted of a meal and performances to engage the community as a focus group.
IMPACT

VIDEO SCREENING - FAU BOCA RATON CAMPUS

On April 20, the airing of a 25-minute highlights video of the March 27th event provided the basis for further conversation on the FAU Boca Raton campus. During the conversation and sharing of refreshments, the audience, consisting of students and faculty, responded to the issues.

Building community through storytelling celebrates our diversity, highlights common values, allows us to share both our troubles and joys, strengthens us as individuals and as a nation.

Listening reminds us of our responsibilities to each other and our planet. As we connect, we give and receive compassion, and remember to laugh.

We look forward to seeing you at future events and hearing your stories.
